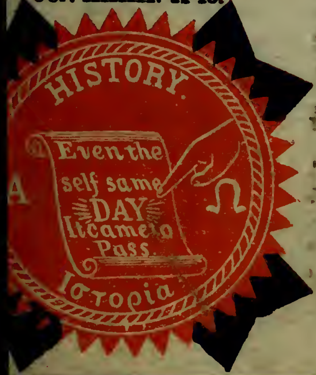
OU[covered] RACE

ITS [covered] D ITS DESTINY.

Serial Devoted to the Study of the Saxon Riddle.

Jer. XXXII. 11-15.



Series V., No. 17. 4th Quarter, 1896.
Subscription for Series, $2.00.

THE CANON OF HISTORY.

THE VICTORIAN CANON.

FROM MENOPHRES, 1322 B.C., O.S.,
VIA PTOLEMY, CENSORINUS and THEON,
TO VICTORIA REGINA, 1896 A.D., N.S.

FACTS OF RECORD.

DAN. II. 44.

C. A. L. TOTTEN.

"TRUTH AGAINST THE WORLD" (Motto of the ancient KUMREE).

"We can do nothing against the truth" (St. Paul); "Great is Truth, and mighty above all things" (Esdras); "Buy the Truth and sell it not" (Solomon); "Truth is stranger than fiction" (Byron); "What is Truth?" (Pilate); "I AM THE TRUTH" (Assertion of THE CHRIST).

Send, Address and Advance Subscriptions, to
THE EDITOR OF "OUR RACE,"
P. O. Box 1333. New Haven, Conn.

New Numbers will be Mailed to Subscribers as they are issued.

"I, too, am of Arcadia."

Supplement to Study No. 17, Our Race Series.

ERRATA, STUDY NO. 17.

Kindly make the following corrections before reading this Study. These typographical errors have crept into the work in spite of many proof readings by each of several careful readers:

Page xi, line 14, read "than have ever."
" xi, " 21, " "during these latter."
" 23, " 26, " "*Rationarium Temporum.*"
" 32, " Table, read "Aug." for "Ang. in 826 Nab."
" 36, " 14, read "Shofar" for "Shofah."
" 37, " 10, " "1461-Vague-year wheel."
" 38, " 10, " "July 20."
" 45, " 23, " "(300–246 B.C.)"
" 65, " 20, " "Phanostratus."
" 65, last line, " "203d."
" 68, line 32, " "70.71."
" 72, " 20, omit first comma, and dot the "i" in "Darius."
" 75, " 21, read "Arbaces."
" 76, opposite 3485 read "Hystaspes."
" 79, line 8, read "40 y. in Midian, Thothmes IV."
" 81, line 4, put asterisk after "Sea,*" and add foot note "*Or else his son and associate—also surnamed Men-ptah, Amen-hotep, or Amenophis met with this fate," see page 82.
" 83, line 5 of foot note, comma (,) after "*fixed.*"
" 88, " 6, read "March 8, 720."
" 95, " 2, " "5.50 p. m."
" 109, Note W, line 3, read "April 21, 1519 A.D."
" 111, line 25-26, read "[(830×365)+47] d = 302,997 d."
" 118, " 34, read "coveries."
" 131, " 28, " "(1912 B.C.)"
" 173, " 42, " "No. 17."

Please call our attention to any other misprints.

This first part of the Victorian Canon is based upon Theon's Rule for its measure, and the reigns then filled in after harmonising the standard authorities.

Part II. Ptolemy's Canon, "as written."

Affording a foundation for Chronology as "Sure as the Stars": *Lindsay*. "One of the most precious monuments of Antiquity": *La Place*.

Note.—The Ptolemaic Canon ignores the dated actual accession. But an analysis of its latter reigns, where we know the actual dates, reveals the key, to wit: Ptolemy counts Thoths or Nab'n New Year days, reckoning as the 1st in each reign that particular one that succeeded the accession. He then assigns full Nab'n years for every Thoth cast off. There are but two exceptions to this rule, and those are for cause, as is fully described in Study No. 16, Our Race Series, pages 350–358. See also excerpt quoted therefrom in accompanying Study pages 28 to 36.

Ptolemy is supposed to have obtained the regnal data contained in the first section of his Canon (our Part II) from the works of Berosus, now unfortunately lost.

—

Part III. Ptolemy's Canon Concluded.

The second part of Ptolemy's Canon begins a new count with Philip because it was the 1000th year of the Canicular. It is from this year inclusive that the Philadelphian Era of Egypt is reckoned. The consolidated count runs on without break.

N. B. The Ptolemaic years are not necessarily the Scriptural ones. The Canon of the Scriptures was finished 100 years before Ptolemy was born. But the two systems form correlative parts of the same sequence of time. The Bible reckons Gentile dates from its identity that circles about Babylon, but is tangent to Ptolemy (see Study No. 12, pages 267–270), and may be easily harmonized whenever necessary.

Here endeth Ptolemy's Canon on Sunday noon, July 14th, 160 A. D. for *Babylon*.

Part IV. Our Continuation of Ptolemy.

Preserving the same system, i. e. counting all Thoth firsts passed over after accession, and giving solid Canonical years for every Thoth first thus counted.

30	Theodosius II	W	"	13	408	43	291	1156–1198	May	1	408	270–312	
31	Marcianus	Th.	"	5	451	6	297	1199–1204	Aug.	24	450	313–318	

Leo the Great succeeded Marcianus in the *East*, and Majorianus came to the Empire of the *West* contemporaneously; but we shall now move the Canon still farther *Westward* with more lasting Empire, to wit:

Part V. The Heptarchy, and all England, from end of Marcianus.

The permanent transfer of the Canonical reckoning, from miscellaneous lines to that of Our Race, is here conveniently effected by taking advantage of the coincidence of dates.

Over this brief period we prefer to move by Spans, skipping all intermediate data. The filling in of included reigns must come out even with the spans specified.

The Nabonassar years intended are those covered between data severally given in the successive lines of the second column down to Egbert's recognition as the 8th Bretwalda of all England in

Defeated Oct. 14, 1066. Thus from 907 Nab., where Ptolemy left off his reckoning, to William the Conqueror, the sum of Thoths (297 + 610 = 907) exactly equal to the measure of his own Canon. In other words Ptolemy bisects (907) the measure (1814) from Nabonassar to William the Conqueror.

Part VI. Canon of the English Monarchs.

From the Norman Conquest, Saturday noon, October 14, 1066 A. D. O. S.

Based on the Ptolemaic System, i. e. reckoning by active Thoths contained in each reign severally, and further checked by referring to the actually included Easters.

To Monday noon, May 18, 1896 A. D. N. S. = Thoth first 2645 Nab.

Which 59th of Victoria, the 830th of the Conquest, and the 2644th of Nabonassar's Era per Ptolemaic method, and the 1461 + 1461 + 297 = 3219th Canicular, i. e. III. 297, Victorian, ends at high noon *for Babylon*, on Monday, May 18th, 1896 A. D. N. S. (May 6th O. S.) and to include which we bring down this Canon, to wit: on the 312th day of the 120th year of American Independence, and to the year 6609 J. P., 5656 H. J., 2649 A. U. C., 5904 A. M.

COMPLIMENTS TO THE CHRONOLOGICAL READER

This end of the Canon is your position, supposed to be at May 18th, 1896 A. D., N. S., or May 6th, 1896 A. D., O. S. Glance up the scroll and then read it down carefully, section by section. The explanation of the Canon is to be found in the accompanying Study. The scroll gives the measure in days, weeks, months, years and reigns, back into Past Time for 3219 Vague years at 365 days each, nearly 3217 Julian years at 365.25 days each, eventually running into Gregorian years at 365.24225 days each after 1752 A. D. In fact it is a perfect Canon of History, three and a half times as long as Ptolemy's, and "picks up" Ptolemy's in its proper place as it progresses backwards to it, and beyond to Menophres, whose position is the only "fixed" one in Ancient Egyptian History, being established by "Theon's Rule," and by Censorinus in *de die Natali*. Finally, had we punctuated the Canon "day by day" (1,174,945), instead of by "reigns" (184), its compass would have required a strip of paper nearly five miles long.
